

Clearbridge Medical Group, in partnership with Genome.One, brings you **GENE.X**.

**GENE.X** provides information on an individual's current state of health and the risk of developing various diseases. It is a health management/screening package comprising of GoExplore™, a clinical grade genomic profiling service, with advanced medical imaging and routine health screening.

The results will be presented as a personalised health report\* and the details provided may allow you and your physician to make informed decisions concerning both clinical interventions and lifestyle choices.

**What is a genomic profile?**

Our bodies are made up of trillions of cells which are controlled by a set of biological instructions known as the human genome. Recent advancements in precision medicine have allowed accurate and reliable analysis of the human genome. The combination of genomic information, the knowledge of disease prevalence, and demographic risks have established the link between peculiarities in the genetic code in individuals and occurrence of diseases. Genomic information can, therefore, help physicians prescribe the most effective treatment and prevention strategies for their patients.

Anyone can undergo the **GENE.X** health package with a recommendation from their physician. Speak to us today to find out more.

## About Us

Clearbridge Medical Group is a subsidiary of Clearbridge Health Limited, an integrated healthcare group with a focus on the delivery of precision medicine with businesses comprising of laboratory testing services, medical clinics/centres and strategic equity participation in complementary precision medical technology companies with a personal touch.

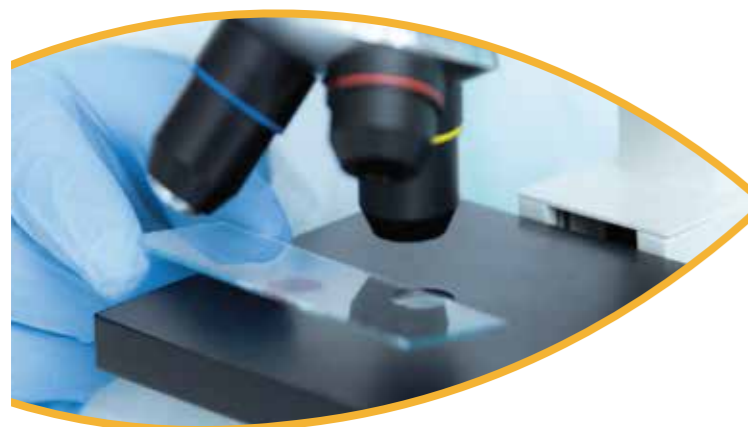

Clearbridge Medical Group has established its leadership in the competitive healthcare sector and is currently present in Singapore, Malaysia, the Philippines, Indonesia, India, Hong Kong and China, with plans to further expand its presence in Pan Asia. The Group is set apart by its direct access to Clearbridge laboratories and breakthroughs at its medtech innovation suites.

Listed on The Catalist Board of the SGX-ST, Clearbridge Health Limited continues to provide ever more effective ways to detect cancer, critical illness, and other lifestyle diseases sweeping the world today.

## 1. Getting started

Your physician will refer you to our genetic counsellor who will assess your suitability for the genomic test.

## 2. Application

Should you be proceeding with the test, necessary documentation and an initial payment will be processed.

## 3. Collection of specimen

A blood specimen will be collected from you for the test.

## 4. Analysing your specimen

Based on the DNA extracted from your specimen, a detailed medical report\* will be prepared for you.

## 5. Results

It can take up to 12 weeks for the huge amount of information in your medical report to be summarised into a nifty report. Your specialist will walk you through the report.

## 6. Review

You have the option to schedule for a post-test review after a year.

## GoExplore™

GoExplore™ by Genome.One (NATA accredited & ISO 15189 certified), is a genomic test that assesses your risks to certain inherited conditions that can be treated, managed, monitored or prevented. Based on your results, our clinical professionals will provide personalized, professional consults with you to best manage your health<sup>1</sup>.

### Why GoExplore™?

- Covers 31 cancers, 13 heart conditions and 9 other inherited conditions which can be prevented.
- Tests individuals for responses to 230 prescriptions and over-the-counter medications.
- Clinical grade whole genome sequencing service in Asia.
- Highest quality in sequencing recognized by US FDA<sup>2</sup>.
- Test results are released in detailed clinical personalised report\* and can be reviewed by a medical professional.

### Did you know?

*Our bodies respond differently, medication that works for others might not work for you.*

## Health Screening

Many diseases are asymptomatic at the early stages of progression. Some of these illnesses include diabetes, coronary heart disease, certain types of cancer and even heart attacks. SAM Clinical Laboratory, accredited by the College of American Pathologists (CAP) in 2015, provides health screening tests for individuals who would like to better understand their current health status.

### Our package includes:

- Haematology
- Lipid/Cardiac Risk Profile
- Diabetic Panel
- Renal Function Test
- Bone Joint Profile
- Liver Function Test
- Tumour Marker
- Thyroid Function Test
- Hepatitis Profile
- Inflammatory Marker

### Did you know?

*Your health is influenced by genetics, lifestyle choices, and environmental factors.*

## Medical Imaging

Medical imaging offers direct visualization of certain tissues and organs within the human body. It is also a non-invasive modality for accurate detection of diseases and abnormalities.

Working hand-in-hand with Asia HealthPartners, our medical imaging services enable the detection of many underlying diseases at an early stage, allowing the most effective care for you.

### Our package includes:

- Chest X-Ray
- Abdominal Ultrasound
- Mammogram (females only)
