

PRO DETECT™ Flu A & B Rapid Test

Influenza is a highly contagious and acute viral infection of the respiratory tract. Type A and B viruses can circulate simultaneously, but usually one type is dominant during a given season. Influenza antigens may be detected in clinical specimens by immunoassay.

ProDetect™ Flu A & B Rapid Test is a rapid immunochromatographic test for the qualitative detection of influenza A and influenza B virus in nasal swab, throat swab and nasal aspirate as an aid in the diagnosis of influenza infection.

FAST

Test result in 15-20 mins.

FLEXIBLE

Screening of infection using nasal swab, nasal aspirate and throat swab samples.

CONVENIENT

Rapid, 24 months shelf life at room temperature.

HIGHLY INFORMATIVE

Simultaneous screening of influenza A and B virus infection.

INFO

Influenza occurs globally with an annual attack rate estimated at 5%–10% in adults and 20%–30% in children. Illnesses can result in hospitalization and death mainly among high-risk groups (the very young, elderly or chronically ill). Worldwide, these annual epidemics are estimated to result in about 3 to 5 million cases of severe illness, and about 250 000 to 500 000 deaths.
